
FAIDH AL-SALAM COMPANY PROFILE

**We provide state of the art services in the field of Engineering, Design, Construction,
and Supply of chemicals and equipment to Refineries and Powerhouses.
Solar System Solution for domestic and industrial sector.
Machinery spare parts**

Company History

Fayd al-Salam (F.S.C LLC) established in 2010, specialized in the field of power generation, water treatment, and building heavy infrastructures. Providing the services related to the management & implementation of the projects in good records starting from the engineering, procurements & logistics, and construction.

Mission And Vision

International commercial and technical transactions between manufacturers/sellers and customers/buyers couldn't be envisaged without reliable bridges. Our Company is intended to be one of these bridges, and has managed to realize that so far. Hence, meeting the needs of its clients, especially in Iraq, at the highest international standards punctually, in one hand, and living up to its financial and ethical commitment with the original suppliers stays a first priority for our Company on the other hand.

Maintaining this priority within a rapidly changing world represents one of our Company's main objectives for the future. This objective is to ensure our Company's concern in matching the growing and varied market demands, and the persistent technological development and the most sophisticated financial transaction in the world. In this regard, we foresee the immense potential of the Iraqi market and the Company's abilities to respond efficiently to this promising market through its accredited commercial relationship with the most prominent world manufacturers and companies.

Excellence: We pursue excellence in everything we do.

Fairness & Integrity: We strive for fairness and adhere to the highest ethical standards.

Teamwork: We support each other and work together to achieve our objectives providing specialized staff according to the nature of each project.

Safety, Health & Environment: We strive to maintain the highest levels of safety, security, health and environmental standards (for people & project sites).

Stewardship: We are proud of our company and committed to preserving its assets and resources.

Trust: We place authority where responsibility lies.

Accountability: We are all accountable for our actions.

What We do?

Fayd al-Salam (F.S.C LLC) Incorporated in 2010, FSC provides engineering services to the oil and gas industries. Through fiscal responsibility and ethical practices, FSC aims to offer high quality services and deliverables. What separates us from the competition is the attention to detail and personal attention that each client and each project receives.

Our Business Strategy

FSC is Committed to continuous growth. We are always being keen to shake up our marketing strategy and engage customers more effectively.

FSC started with an undifferentiated targeting strategy as it served the same attitude to all customers. However, in recent times, we have started localizing our contact and response for better acceptability in the market.

Activities

Our activities are in compliance with international applicable Codes and Standards, like (but exclusively): ASME, BS, AWS, and API. Through its head office in Erbil, the general management of Fayd al-Salam (F.S.C.) manages the financial, technical, and administrative issues related to its activities.

The Main focusing areas are:

Supply Chemical Materials

We have agreements to supply chemical materials from international companies.

Tendering

Prepare feasibility studies for the tenders and suggested projects and follow up and discuss tenders with the end users and manufacturers through the time of awarding.

Engineering & Procurement

Our process engineers can address all aspects of the project from a practical as well as a theoretical perspective. FZS combines extensive knowledge of unit operations with the ability to partner with technology suppliers to ensure the client derives maximum benefit.

Construction

Complete general contracting services integrating civil, mechanical, electrical and instrumentation disciplines, are core strength.

Spare Parts for Heavy Machinery

We are supplying high-quality spare parts and consumables for all types of construction, road, agricultural, industrial and auxiliary equipment of famous world manufacturers.

Solar System

Domestic and Industrial Solution for installation and commissioning of complete solar systems.

PLC Installation and Programming

Professional PLC programming, engineering, integration, and automation services for all platforms: Siemens, Allen-Bradley Rockwell, ABB, etc...

Training Course

We are deliver our services in supervision and giving training courses according to international standards for operation, maintenance and safety of oil and gas sites.

GLIMPSE OF SUPPLYING PROJECTS LIST

A. Field of supplying:

- Control Panel & Transformers 31.5 MVA to the Ministry of Industry.
- Condenser cooling tubes to the Ministry of Oil.
- Install CNC Machine to Ministry of Industry.
- A complete Water Pumping Station to Abu Ghraib Water Project.
- A complete clarifiers and control system to Al-Zubaidyah Water projects.
- Fabricated steel plates for storage oil tanks to Ministry of Industry.
- Two diesel Generators 1250 KVA to Ministry of Electricity.
- A complete electrical network 11 KV to Tarmiyah district.
- A complete 33 / 11 KV substation equipment to Ministry of Electricity.
- Air intake and Different filters to the Ministry of Electricity.
- Industrial computers for the Ministry of Oil.
- Field laboratories for the Ministry of Industry.
- Industrial pumps for Ministry of Industry.
- Circuit Breakers to Ministry of Electricity.

B. Field of Construction:

- MOE/ Alabayachi 33/ 11 KV substation on Turnkey bases.
- USACE/ Agarquf electrical networks 33 / 11 KV.
- Supplied; install two storage oil tanks, 4000 M3 each for the Ministry of Oil.
- Supplied, install water intake pumping station for Ministry of Oil.
- PCGC Management staff has an accumulated experience in the construction of Power Plants and substations in Iraq whom they had worked for the Ministry of Electricity- such as Al-Qudas GTPP, Baiji GTP and now being employed by PCGC.

C. Field of Logistics:

- Stevedoring, storing, loading, transporting and unloading of all water treatment plant equipment (22,000 Tons) from Aqaba seaport-Jordan to Alzubaidya water project site.
- Stevedoring, storing, loading, transporting and unloading of all water treatment plant equipment (27,000 Tons) from Aqaba seaport-Jordan to Abu Ghraib water project site-Iraq.

GLIMPSE OF CONSTRUCTION PROJECTS

- Implementation of sedimentation works in the water treatment unit in Muftiyah, Basrah.
- Execution of the building and filtering unit in the water treatment unit in Amuftih, Basrah.
- Implementation of the realization of the pipeline network and water treatment unit in Amuftih, Basra.
- Implementation of the realization of the rehabilitation of the tower and paint unit in the Shuaiba refinery in Basra.
- Execution of the demolition and rebuilding of a cooling tower and oils unit in Shuaiba refinery in Basra.
- Implementation of the rules of concrete and install Benzene compressor and execution of the rule's compressor of hydrogenation unit and installation work hydrogenation compressor in the Shuaiba refinery in Basra.
- Execution of the development of a residential camp in a power plant in Kirkuk.
- Execution of the development of a residential camp for the Chinese-Com CNOOC in Maysan.
- Execution of the discharge station and water treatment project in industrial city in Thi-Qar.
- Execution of the rules concrete and concrete fence work in the industrial zone in Thi-Qar.
- Execution of the processing and replacement of expansion joints for bridges (Muhammad al-Qasim) and Alkizh in the province of Basra.
- Implementation of the development of a residential camp in the port of Khor Al-Zubair in Basra.
- Implementation of the epoxy coating to a multi-storey garage floor in Maysan.
- Implementation of epoxy paints to the fuel tank in the Shuaiba refinery in Basra.
- Implementation of storage sheds number (7) in the third refining unit to Shuaiba refinery in Basra.
- Implementation of the treatment to the crypt Bank of Baghdad branch of Basra.
- Perform the replacement of rubber fenders for docks of the port of Umm Qasr in Basrah.
- Implementation of the planning of the streets of Baghdad airport road.
- Implementation of the epoxy paint for floors and maintenance workshop for TATA company in the province of Baghdad.
- The execution of the demolition and rebuilding of a cooling tower and oils unit in Shuaiba refinery in Basra.
- Inspection and supply of equipment and documentation for the Desalter, Dehydrators in the central Subba field in Dhi-Qar.
